Clare Valley Beef

Clare Valley Gold meat is extremely tender and has a wonderful rich taste. The cattle are grain fed for 100 days and graded under the Meat Standards Australia grading system to ensure the brand delivers on its eating quality promise. Because the cattle are grain fed (GMO free) during fattening period, the meat has a very delicate taste. High levels of marbling produce a unique combination of flavour and tenderness. The meat is extremely soft and succulent, which definitely benefits the taste. The cattle are raised in an environment with ample space to pasture and with absolute control from raising the cattle through processing, packaging and shipment, Clare Valley Gold leaves nothing to a chance.

Kangaroo Island Lamb

Kangaroo Island Lamb are not confined to feeding yards, they are free to roam on the farm. They're not artificially managed or fed grain treated additives but instead feed on natural sub clover rye grass – resulting in a flavoursome, high quality, and tender meat. Kangaroo Island Lamb is as natural as Kangaroo Island itself. The island's mild climate, the lush and pristine spring pastures, the stress-free environment, together with the maritime surroundings produce tender choice lamb with a subtle salt like sharpness – a result of the sea spray combining with rain on a pasture.

Island Beehive

This rare honey is produced by the Ligurian bee on the pristine Kangaroo Island, off Australia's south coast. The island is a Ligurian bee sanctuary and therefore is home to the purest strain of these bees in the world. With the hives located in one of the most remote parts of the island, the bees have access to the cup gum flower, which helps to produce this pure, organic honey, yielding a delicate and subtle flavour.
